

WOODSMITH

WOODSMITH CUSTOM CONTENDER®/G2® AND ENCORE®

REPLACEMENT STOCKS, GRIPS AND FOREARMS

Stocks are individually made to suit your needs. The length of pull, comb shape, etc. will be determined at the time of your order. Specify right handed, left handed or ambidextrous. Pistol grips are also made to suit each individual - send a tracing of your outstretched hand for the best fit.

Semi-finished woodwork:

·Fully shaped and inletted, butt pad installed on stocks

- BB Grip draw-bolt with attached sling stud \$25
- Finger grooves on buttstock \$60

We work with the below laminate colors for the Thompson/Center actions and custom bolt-action rifles. The laminate products used are common for the gun industry and will match similar products from other stock manufacturers, though dye-lots may show slight variation; select from Salt & Pepper, Green Mountain Camo, or Nutmeg. **All laminate products are priced as Standard grade woodwork.**

We also offer synthetic forearms suited for our free-floating hanger bar system in black and camouflage (Encore only). These forearms are externally identical to those throughout the industry. The interiors are modified to accept our system and mount to the hanger bar with only one screw.

Woodsmith services are available for custom bolt-actions when ordered with a rebarrel on your supplied action, or as a full custom gun. Please call with any questions. Options are nearly endless with the same attention to detail, custom fit and guaranteed accuracy that you have come to expect from a Bullberry firearm.

*These are starting prices for Exhibition grade woods. Each blank is individually priced with supplied photographs upon request
